

Emissions from Composting

September 18, 2020

2:30 pm (eastern), 1:30 pm (central), 12:30 pm (mountain), 11:30 am (pacific)

In previous webinars we have discussed the value and use of compost from livestock and poultry operations. In addition, we have addressed use of composting as a method for handling mortalities. This month we will focus on air emissions associated different methods of composting and the subsequent emissions when composted manure is applied to cropland.

An application for continuing education credit for Certified Crop Advisors (CCAs) and members of the American Registry of Professional Animal Scientists (ARPAS) will be submitted.

Mario E. de Haro Martí (Ph.D., University of Idaho) is a Professor and Extension Educator in Gooding County, Idaho. He provides multi-county environmental education and applied research in the areas of livestock waste and nutrient management, air and water quality, agricultural pollution prevention, dairy production, and bilingual training of the dairy workforce. Mario's applied research and education programs include dairy composting improvement, vermicomposting, reduction of air emissions from livestock operations, and helping livestock producers to increase production efficiencies while reducing their environmental impact. Email: mdeharo@uidaho.edu

Dr. April Leytem is a research scientist at the United States Department of Agriculture Agricultural Research Service in Kimberly, Idaho. Dr. Leytem's research addresses problems related to nutrient cycling in livestock/cropping systems and conducts research to help assure sustainable livestock production while better protecting water and air quality. Email: april.leytem@usda.gov

How do I participate?

On the day of the webinar, go to lpec.org/live-webinar-information/ to download the speaker's power point presentations and connect to the virtual meeting room. First time viewers should also follow the steps at: lpec.org/how-do-i-participate-in-a-webcast/.

Where do I find more information?

- University of Idaho Nutrient Management
