**Instructions to Access NMPT**

Enter your User ID and Password, and then click 'Login'.

The Nutrient Management Planning Tool (NMPT) is an internet-based HTML computer program developed to assist landowners in making informed decisions about making nutrient applications. The program is free to use for landowners and results from a team effort of private industry and agency staff. The NMPT development team members include:

- Tom Thomson, Professional Agronomist, Northwest Agricultural Consulting, Dallas, OR
- Bruce D. Wilson, Professional Engineer, H&R Engineering LLC, Keizer, OR
- Thomas Hatley, Professional HTML Programmer, Dallas, OR

**Note:** NMPT is a record keeping and planning tool only and is not a predictive tool for future nutrient and/or manure applications.

## Background

Funds for developing NMPT came from a \$110,000 Conservation Innovation Grant (CIG) provided by the Natural Resources Conservation Service (NRCS). Special thanks go to the following local and state agencies who provided the 25% cash match needed to qualify for the CIG:

- Oregon Department of Agriculture Confined Animal Feeding Program
- Marion County Soil and Water Conservation District
- Tillamook County Soil and Water Conservation District

The Natural Resources Conservation Service (NRCS) Conservation Innovation Grant (CIG) was completed December 31, 2016. Additional moneys have been received from the following entities to continue development of the NMPT program for nutrient management planning and record keeping:

- Oregon Dairy Farmers Association
- Oregon Department of Agriculture Confined Animal Feeding Program
- Tillamook County Soil and Water Conservation District

Total funding to date for the NMPT program is \$225,000 and approximately 2,500 hours have been invested by the development team members to support the NMPT program.
