

LIVESTOCK AND POULTRY ENVIRONMENTAL LEARNING COMMUNITY (LPELC)

WHAT IS THE LPELC?

Originally established through USDA funding as a network of professionals from across the U.S., the LPELC now connects those with an interest and expertise in some aspect of animal agriculture and environmental stewardship. (A niceway of saying we talk about manure... a lot.) A learning network like the LPELC strives to bring together all types of expertise; all the way from research and technical knowledge to application of science on the farm.

Topic areas include: air quality, beginning farmer, climate change, environmental planning, feed management, manure nutrients, manure storage, manure treatment, pathogens, mortality management, regulations, small farms, and economics of manure.

OUR MISSION:

Individuals involved in public policy issues, animal production, and delivery of technical services for animal agriculture will have on-demand access to the nation's best science-based resources that is responsive to priority and emerging environmental issues associated with animal agriculture.
